The 710W solar panel is a high power module that uses the latest half-cut technology to make each cell a complete cut, avoiding hidden cracks. The half-cell design reduces operating current and hot spot temperature, ensuring high module power. 12BB's multi-gate design allows the module to collect current efficiently and consistently.

Founded in 1994, Jingsun Group is a company specializing in the production and development of renewable energy. Our company currently adopts the most advanced production automation technology, and has provided customers with more than 2GW photovoltaic solar panels and millions of cells, solar charge controllers, inverters, mounting brackets and other solar products.

The SSM680-710W solar panel by Sunergy Solar is a high-performance and efficient solution for generating renewable energy. With power outputs ranging from 680W to 710W, these panels provide exceptional power generation ...
