

Solar Inverter project financing options in Netherlands 2026

How to assess the investment plans for wind and solar in the Netherlands?

In order to assess the investment plans for wind and solar in the Netherlands by European utility companies we rely on the investment plans of the large publicly-traded companies and we use the company's existing market share (as per BNEF) to estimate what would be the overall investment if all companies would follow similar investment plans.

How can public and private institutions invest in the Dutch energy transition?

Public and private institutions investing in the Dutch energy transition need to be able to make efficient and effective investment decisions, which requires a strong, consistent evidence-base. Policymakers are faced with questions such as: How can we finance a successful energy transition that will enable us to meet our climate ambitions?

How much money do banks invest in wind & solar projects?

According to their latest reports, these banks have a current exposure of EUR 11.9bn to project finance in both wind and solar projects, of which EUR 3.6bn is estimated to be in the Netherlands. Of the total amount invested in the Netherlands, EUR 2.5bn were directed to wind projects, and the remaining to solar energy projects.

Why do NedZero and Holland Solar need a Sde++ solution?

NedZero and Holland Solar call on the government to quickly come up with a solution so that sustainable projects can continue. "Continuation of the SDE++ is the basis of the trust that entrepreneurs have in the government to be able to make their investments more sustainable.

Will the Netherlands be an emission free power sector by 2035?

Furthermore, the Netherlands aims for an emission free power sector by 2035. The current Dutch electricity mix is heavily dependent on gas and coal generation, with shares of 36.8% and 8.3% in 2023, respectively, as shown in the left-hand chart above.

Are solar PV investments accounted for in a large-scale investment?

For our purpose, we only focus on large-scale investments. That is, solar PV investments by households and building's rooftops are not accounted for in this exercise. The capacity target for offshore wind is 16GW by end of 2030 (2) and 8.8GW for onshore wind. Such targets are associated with huge investments towards 2030.
