Heating water with solar energy from the sun is the most cost-effective technology in South Africa. Save money - A SunTank solar geyser correctly sized can save you as much as 50% of your total monthly electricity bill and 80% of your water heating costs. The pay-back on your investment is less than 2 years, leaving thousands of Rands in your pocket, for many years thereafter.

Solar water heating systems, or solar thermal systems, use energy from the sun to warm water for storage in a hot water cylinder or thermal store. Because the amount of available solar energy varies throughout the year, a solar water heating system won't provide 100% of the hot water required throughout the year.

The standard on roof panel mounting system is constructed of stainless steel brackets that are fitted underneath the solar thermal panels. The brackets are then attached directly to the roof rafters. Rails are then fixed to ...
