2a) Open Alipay Tour Card. See the section that reads "Add TourCard to Alipay / WeChat wallet". Tap on the icon for "WeChat" directly underneath. This will bring up "Binding instructions" for how to bind the Tour Card to WeChat. 2b) Go back to the home page of the Tour Card mini app.

The DataContext for the DataTrigger is set to the window, that's why it looks at the window for "State". You just need to tell the binding that State is on the user control. Try this: <DataTrigger Binding="{Binding Path=State, RelativeSource={RelativeSource Mode=FindAncestor, AncestorType=UserControl}}" Value="True">

# State Grid WeChat Binding User

"WeChat binding" success lies on leveraging every touchpoint available and offering a seamless user experience. Some of the key takeaways from the presentation were ...

Oh, yes, I missed that. But if you're creating a UserControl, I don't think it's a good idea to manually set the DataContext. The DataContext is intended to represent the context inherited or assigned from the container. The RelativeSource binding allows you to achieve the desired result (binding to the DependencyProperty) while not interrupting the standard ...

4 main steps to help you identify your customers on WeChat and implement an effective WeChat binding campaign. ... Binding should also be incentivized by providing a seamless and rewarding user experience. Splio is an omnichannel marketing platform that combines Marketing Automation, Loyalty Marketing, and WeChat Marketing. ...

How to bind a grid to a user control. 0. Binding textboxes inside a usercontrol to datagrid. 3. WPF UserControl - SelectedItem of a UserControl DataGrid to bind to a ItemSource to DataGrid outside the UserControl. 3. How to bind a user control using as a DataGridTemplateColumn failed in WPF. 1.

Your last point is directly what I'm working with now. I've devised a way to use a DialogHelper that instantiates a CustomDialogView : Window. The contents of that dialog window could be one of any 3 (or more) UserControls. So instead of queuing the user control in the ViewModel (as I'm doing now), I could use a string and have all the user controls in the ...
