What is the long-term business case for storage in Greece?

The long term business case for storage will be supported by increasing interconnection, opening ancillary services and Greece's accession to the market coupling platforms, but until then, public funding is required to kickstart investment. Funding was first announced in 2021 as part of the National Recovery and Resilience Plan.

Does Greece have a battery storage pipeline?

Greece has emerged as one of the countries with the largest pipeline of battery storage projects, but as yet there has been little activity on the ground. This is changing as the long-awaited storage subsidy auctions have started, with the first projects being awarded support for both investment and operating costs.
